WARRANTY

Task Force Tips LLC, 3701 Innovation Way, Valparaiso, Indiana 46383-9327 USA (“TFT”) warrants to the original purchaser of its Adapters and other equipment (“equipment”), and to anyone to whom it is transferred, that the equipment shall be free from defects in material and workmanship during the five (5) year period from the date of purchase.

TFT’s obligation under this warranty is specifically limited to replacing or repairing the equipment (or its parts) which are shown by TFT’s examination to be in a defective condition attributable to TFT. To qualify for this limited warranty, the claimant must return the equipment to TFT, at 3701 Innovation Way, Valparaiso, Indiana 46383-9327 USA, within a reasonable time after discovery of the defect. TFT will examine the equipment. If TFT determines that there is a defect attributable to it, TFT will correct the problem within a reasonable time. If the equipment is covered by this limited warranty, TFT will assume the expenses of repair.

If any defect attributable to TFT under this limited warranty cannot be reasonably cured by repair or replacement, TFT may elect to refund the purchase price of the equipment, less reasonable depreciation, in complete discharge of its obligations under this limited warranty. If TFT makes this election, claimant shall return the equipment to TFT free and clear of any liens and encumbrances.

This is a limited warranty. The original purchaser of the equipment, any person to whom it is transferred, and any person who is an intended or unintended beneficiary of the equipment, shall not be entitled to recover from TFT any consequential or incidental damages for injury to person and/or property resulting from any defective equipment manufactured or assembled by TFT. It is agreed and understood that the price stated for the equipment is in part consideration for limiting TFT’s liability. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above may not apply to you.

TFT shall have no obligation under this limited warranty if the equipment is, or has been, misused or neglected (including failure to provide reasonable maintenance) or if there have been accidents to the equipment or if it has been repaired or altered by someone else.

THIS IS A LIMITED EXPRESS WARRANTY ONLY. TFT EXPRESSLY DISCLAIMS WITH RESPECT TO THE EQUIPMENT ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND ALL IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE. THERE IS NO WARRANTY OF ANY NATURE MADE BY TFT BEYOND THAT STATED IN THIS DOCUMENT.

This limited warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Items which are received in non-returnable condition for credit will be handled in one of the following ways:

- Destroyed with Purchaser's approval
- Returned to Purchaser at its expense

THREAD ORDERING INFORMATION

NH: National Hose threads (NH) per NFPA 163. British Standard Pipe threads (BSP) with 55 degree Whitworth form are produced to ISO 228. Straight Iron Pipe threads (NPSH, IPT or SIPT) are produced to ANSI/ASME B1.20.7-1991. Tapered Iron Pipe threads (NPT, TPT or TIPT) are produced to ANSI/ASME B1.20.1-1983 (R1992). Consult the factory for further information.

Thread Code Notation:

There is no additional charge for special threads. We maintain a library of hundreds of special thread specifications. Specifications from individual cities with functionally identical threads are grouped together in thread codes. Common codes are listed on page 5. TFT's code or specifications for threads will be needed at time of order. Please include TPI (threads per inch) and ODM (outside diameter). Also provide name of city to assure special threads match your specification.

TFT's innovative manufacturing processes allow for quick deliveries on both standard and special threads. Our goal is to deliver adapters in 2 weeks, check with TFT order entry staff for exact delivery times for your order.

DETERMINING THREAD DIMENSIONS

How to determine your thread dimensions if Leaf Thread Gage and O.D. Tape are not available.

- 1) Cut a strip of paper about 1" wide and long enough to completely encircle the male thread.
- 2) Wrap this paper snugly around the male thread making sure it is against the shoulder all the way around. Pierce the paper with a pin at some point where the paper overlaps. (Figure 1)
- 3) Using your thumb, press firmly against the threads round the entire circumference to leave an impression of the thread. This impression in the paper is used to determine the threads per inch. (Figure 2)
- 4) Remove the paper strip and circle pin holes with pencil.
- 5) The distance between the pin holes divided by 3.1416 equals the ODM (outside diameter of the male).
- 6) The impressions on the paper give the number of threads per inch (TPI) Both the ODM and TPI are needed. (Figure 3)
- 7) You may use the same method to determine the outside diameter (OD) of a hose.

Note: Do not measure a badly worn thread. If only a worn thread is available, send the male fitting to TFT for an accurate determination of the thread dimensions. Both the ODM and the TPI are needed for ordering purposes. Unified thread form supplied unless otherwise specified.

ADAPTERS — AA Series, Threaded

TFT AA series threaded adapters are designed for pressure or vacuum service on a hydrant, pumper or on the ground. Their maximum operating pressure is 300 psi (20 bar) and they are compliant to NFPA 1964 2018 edition which dictates a 900 psi (62 bar) hydrostatic strength test. The aluminum parts are hardcoat anodized per MIL-A-8625F Type III, Class 2 for maximum corrosion protection. Adapters are permanently marked with the thread size and TPI per NFPA. 2.5" and smaller swivel connections use stainless steel ball bearings, not piston rings, to ensure longevity and easy serviceability. 3.0" and larger connections use polymer bearing rings which provide electrical isolation to help prevent galvanic corrosion.

ADAPTERS — AA Series, Storz

TFT AA series Storz adapters are designed for pressure or vacuum service on a hydrant, pumper or on the ground. Their maximum operating pressure is 300 psi (20 bar) and they are compliant to NFPA 1964 2018 edition which dictates a 900 psi (62 bar) hydrostatic strength test. The aluminum parts are hardcoat anodized per MIL-A-8625 Type III, Class 2 for maximum corrosion protection. Adapters are permanently marked with the thread size and TPI per NFPA and include a red anodized aluminum locking lever (4", 5" and 6"). Connections use polymer bearing rings which provide electrical isolation to help prevent galvanic corrosion. All Storz adapters are supplied with pressure gaskets. Suction gaskets are available. All 4" and 5" Storz Rigid couplings may be switched from rigid to swivel by loosening the lock screw. All 6" Storz couplings have an adjustable seal compression feature.

ELBOWS — AH Series, Threaded

TFT AH series threaded elbows are cast to a 30-degree down angle for easy connection and to relieve the weight of the hose when connected. Their maximum operating pressure is 300 psi (20 bar) and they are compliant to NFPA 1964 2018 edition which dictates a 900 psi (62 bar) hydrostatic strength test. The aluminum parts are hardcoat anodized per MIL-A-8625 Type III, Class 2 for maximum corrosion protection then powder coated silver. Hose couplings are attached using polymer bearing rings which provide electrical isolation to help prevent galvanic corrosion.

The 90 Degree Elbow has a full-time ball bearing swivel that allows 360° rotation while coupling remains secured. The elbow has 1/4" NPT and 3/4" NPT ports to allow installation of a pressure gauge and/or bleeder. Constructed of hardcoat anodized aluminum alloys, with powder coat finish inside and out on the elbow casting for maximum corrosion protection. Maximum operating pressure is 300 psi (20 bar) and they are compliant to NFPA 1964 2018 edition which dictates a 900 psi (62 bar) hydrostatic strength test.

DETENT ELBOWS — AJ Series

TFT AJ series detent elbows are cast to a 30-degree down angle for easy connection and to relieve the weight of the hose when connected. The swivel includes multiple detent options that allow the elbow to swivel 360 degrees. This makes the LDH connection easy and will allow the hose to find its path of least resistance on its own. They are an ideal elbow for pumps with built-in intake valves. Their maximum operating pressure is 300 psi (20 bar) and they are compliant to NFPA 1964 2018 edition which dictates a 900 psi (62 bar) hydrostatic strength test. The aluminum parts are hardcoat anodized per MIL-A-8625 Type III, Class 2 for maximum corrosion protection then powder coated silver. Hose couplings are attached using polymer bearing rings which provide electrical isolation to help prevent galvanic corrosion. All 4" and 5" Storz Rigid couplings may be switched from rigid to swivel by loosening the lock screw. All 6" Storz couplings have an adjustable seal compression feature.
